

MAINTAIN YOUR SCREWFINDER™

Sometimes the edge hits the screw head and the edge is damaged. The edge gets blunter after long-term use. This doesn't mean you have to throw out your Screwfinder. In just a few simple operations you can clean and freshen it up.

- ✓ Dismount plaster boards intact!
- ✓ Avoid all that cleaning!
- ✓ Avoid using breathing masks/ protective masks!
- ✓ Avoid using air cleaners/ dust traps!
- ✓ No need for plaster in the work area!

How is it done

How do you dismount boards with Screwfinder? Screwfinder finds hidden screws along with joists in plaster walls, chipboard walls, MDF boards, in principle in all types of construction boards. This allows boards to be dismounted whole. They can then be reused.

Work more efficiently

Screwfinder allows you to work more efficiently, recycle plasterboards, spend less time on cleaning. You will work more effectively and quickly.

SCREWS IN ALL
TYPES OF BOARD.
REUSE THE
BOARDS AND
SAVE MONEY.**

Screwfinder™

Screwfinder allows construction boards to be dismantled and carefully removed without them breaking and without excess dust.

Screwfinder is a spring-loaded device with a magnet on the tip, which is used for finding screws and joists in plaster and other boards mounted on walls and ceilings. When the magnet finds a screw it is sucked onto the screw, then tap gently with a hammer to mark/remove the screw. Then screw the screw driver out with a screwdriver.

The dismantled boards can then be reused.

"Why must plasterboards be demolished; there must be a way of holding the plasterboards so they can be unscrewed from walls and ceilings without excessive dust", this was running through the head of Jimmy Berggren, when he invented the original Screwfinder.

MADE IN SWEDEN

A Swedish Quality Product

Screwfinder is not only a unique innovative tool, but is also made from carefully selected materials. Among other things, the steel is of the highest quality [SS-234]. Everything needed to deal with years of hard wear.

THIS IS HOW THE SCREWFINDER™ CAN MAKE YOUR LIFE THAT MUCH SIMPLER!

FINDS SCREWS

LOOK FOR THE SCREW WITH THE SCREWFINDER

MARK LIGHTLY WITH A HAMMER WHEN SCREWFINDER FINDS THE SCREW. THE SCREW IS EXPOSED.

UNSCREW THE SCREW. DONE!

FINDS JOISTS

LOOK FOR SCREWS IN JOISTS WITH SCREWFINDER

MARK THE LOCATION OF THE JOIST WITH A PEN

MAKE YOUR MOUNT. DONE!
